#### DETAILED ACTION

## Claim Objections

1. Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depended on the multiple dependent claims. See MPEP § 608.01(n).

#### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3 and 5-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 3-78,703.

The reference discloses that a compound expressed by formula I or the copper complex compound thereof is applied on the base material.

10/587,674 Art Unit: 1795

$$(HO_3S)_{1-2} \Lambda - N = N - O - N = N - O - N = N - O - R$$

$$CH_3 OCH_3 OH - N = N - O - N = N - O - R$$

$$CH_3 CH_3 OCH_3 OH - N = N - O - N = N - O - R$$

$$CH_3 CH_3 CH_3 OCH_3 OH - N = N - O - N = N - O - N = N - O - R$$

In the formula I, A denotes a <u>benzene ring</u> or naphthalene ring which may have <u>a methyl</u> group; R denotes an amino group, methylamino group, ethylamino group, acetyl amino group, <u>benzoylamino group</u>, phenylamino group, phenyl group, or 4-carboxyphenyl group, respectively. R is connected to the 6-th or 7-th position of a naphthalene ring.

Particularly, the compound in example 11

The polarizing plate in which the axes of polarization are patterned continuously in arbitrary direction and which has a high polarization rate is easily and inexpensively obtained.

The reference anticipates the claimed invention. If not anticipated because the claimed compounds are not exemplified, it would have been obvious to those skilled in the art to utilize the reference teaching by modifying the starting material as examples 7-9, which has two SO<sub>3</sub>H groups or one SO<sub>3</sub>H and one methyl group at benzene ring to arrive at the claimed invention.

### Allowable Subject Matter

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and

10/587,674

Art Unit: 1795

any intervening claims. The present claim has more specific groups connected to the formula (1).

The prior art fails to disclose such compound.

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited except JP 3-78703 in IDS submitted on 10/6/06 fail to disclose the benzene ring at left terminal has two substituents and benzoylamino group at right terminal.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 10:30 AM to 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
